Week end	8

4 week average Heat Map explanation
May 2013

This heat map gives a quick assessment of team performance over the last 4 weeks.
It basically attempts to answer the question: What teams are hot/cold right now?

The numbers are the average category score over the past 4 weeks.
If your 4 week average is very good (hot) or bad (cold) then it is highlighted:

HOT is more than one standard deviation **better** than average... a NIPR of >= 100

COLD is more than one standard deviation **worse** than average... a NIPR <= -100
