FIERCE FRENCH FRIES!	97	8		103	4		93	6

The New & Improved Power Rating (NIPR)
May 2006

The **NIPR** scores your team's performace as compared to that of the league averages for each category.
A score of 100 means that your team is average for the league.
A score >100 in any category means that your teams is better than average... <100 means worse than average.
NIPR-1 is your NIPR with your worst category dropped... a lot of people ignore a category or two in creating their team.

The NIPR averages all your category scores. For example, an NIPR of 110 means that your team is on average 10% better than the average team in the league across all 10 categories.

I also calculate 3 NIPR "specialty" ratings in the areas of hitting, pitching quality and pitching quantity:
  BOPPER: The Bopper rating uses the same approach, but only counts Run, Hr, Rbi and Tb.
  PQUAL: measures performance in ERA and Whip.
  PQUAN: measures performance in Wins, and K's.

I split pitching into separate ratings because some people aim for quality, some for quantity and some for both.
enjoy... yow, bill
