

Buffalo Chatbots – LP3 2025

What's up with the LP3 robo-team

My notes on the robo-team, the Buffalo Chatbots.

thanks...yow, bill

Maintenance

I do two types of Buffalo maintenance during the season:

- ✓ **Weekly** – I'll check the Buffalo lineup for injuries on Monday mornings. If yes, then I'll put the player on IL and replace him with someone from the bench. If there's no player on the bench for that position, then I'll add the top Yahoo-ranked player (last 30 days) from the scrap heap.
- ✓ **Monthly** – On the first Monday of each month, I'll check the Buffalo lineup for under-performers. If Buffalo has a bench player with a higher Yahoo rank (last 30 days), then I'll move him into the starting lineup.

Moves

Buffalo regular season moves:

- Week 1: none
- Week 2: none
- Week 3: SP Pablo Lopez (min) to IL; M Boyd (cub) to SP
- Week 4: RP J Romano (phi) to bench; E Fedde (stl) to P
 - **Ugh.** This corrects 3 weeks of Commish error. I had three RP in the Buffalo lineup instead of two. This caused Buffalo to miss the 25 IP requirement in Week 3. What can I say: My bad!
- Week 5: 1B L Arraez (ari) to IL; add Pavin Smith (ari) to 1B
- Week 6:

Draft

EZ – Rounds 1-15 were auto-drafted by Yahoo.

Slow – Buffalo picks in the Rounds 16-20:

- I waited till everyone else completed Rounds 16-20 before making Buffalo's picks.
- I picked the top, uninjured Yahoo-ranked player (Next season projections) at these positions: 2 hitters (from different positions), 2 SP, 1 RP
 - Garrett Mitchell (mil) OF
 - Maikel Garcia (kc) 2B,3B – fudged a little here and took the best 3B because the Buffalo 3B is already on IL
 - Erick Fedde (stl) SP
 - Matthew Boyd (cub) SP
 - *Robert Garcia (tex) RP*
